

Land Manager™ SE controller from DICKEY-john®

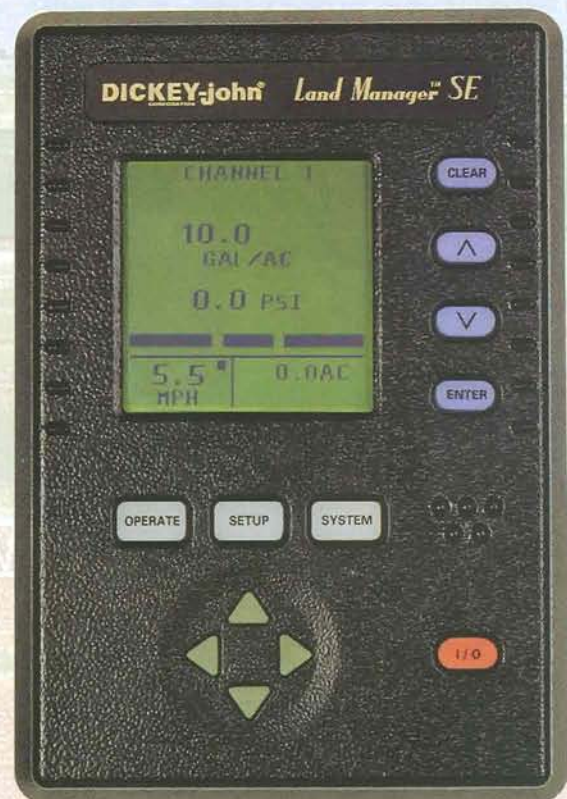

- **Liquid - Granular - Anhydrous**
- Flow or pressure based
- **Quick and easy setup**
- **Change rates on-the-go**
- **Up to 6 boom inputs**
- **Robust design for agricultural environment**

The Land Manager™ SE from DICKEY-john® provides farmers and applicators with an economical, yet highly capable choice in an application controller. A natural outgrowth of the Land Manager™/Land Manager™ II family of controllers, the SE is designed for those who want a rugged and capable base unit without adding the cost of features found on multi-channel units.

Land Manager SE standard features include:

- Controls proportional/hydraulic, servo and electric drives
- Digital accessory input (hopper level, fan RPM or vapor detector)
- Product level monitoring
- Password protection
- Distance measurement
- Speed/area monitoring mode
- Alarm history (up to 5 alarms)
- U.S. or metric units
- Non-volatile memory retains settings when disconnected from battery
